	Plan		Do	Check	Act
Manage product portfolio	Compile list of products Decision on the list of products Provide input for production p	Build tools for measuring user satisfaction and collecting user	Monitor user satisfaction and collect user needs	Evaluate user satisfaction and user needs	Decision on implementing the changes resulting from the evaluation
Manage data sources	Compile list of data sources Decision on the list of data sources Provide input for production p	Ensure legal backround for aquiring data	Monitor data aquisition	Evaluate data aquisition	Decision on implementing the charges resulting from the evaluation
Manage quality assurance	Set target value of quality indicators Provide input for production p	Build quality measurement instruments	Monitor quality indicators	Evaluate quality indicators	Decision on implementing the changes resulting from the evaluation
<b>₩</b>					
Manage production	Plan production processes	Build production     processes	Production	Evaluate production processes	Decision on implementing the changes resulting from the evaluation
	Plan data aquisition processes	Build data aquisition processes     Date	a collection	Evaluate data aquisition processes	Decision on implementing the changes resulting from the evaluation
	Plan processing processes	Build processing processes	Data processing	Evaluate processing processes	Decision on implementing the changes resulting from the evaluation
	Plan analysis processes	Build analysis processes	Analysis	Evaluate analysis processes	Decision on implementing the changes resulting from the evaluation
	Plan dissemination processes	Build dissemination processes		Dissemination	Decision on implementing the changes resulting from the evaluation
Manage HR	Plan human resources for production	Supply human resources Prerequisite for other processes!	Monitor performance	Evaluate human resources (production)	Decision on implementing the changes resulting from the evaluation
Manage finances	Plan budget of production	Supply financial resources	Monitor finances	Evaluate finances (production)	Decision on implementing the changes resulting from the evaluation
Manage IT resources	Plan IT resources for production	Supply IT resources Prerequisite for other processes!	Monitor IT resources	Evaluate IT resources (production)	Decision on implementing the changes resulting from the evaluation
